

Cleaning it up!

Waste Hierarchy

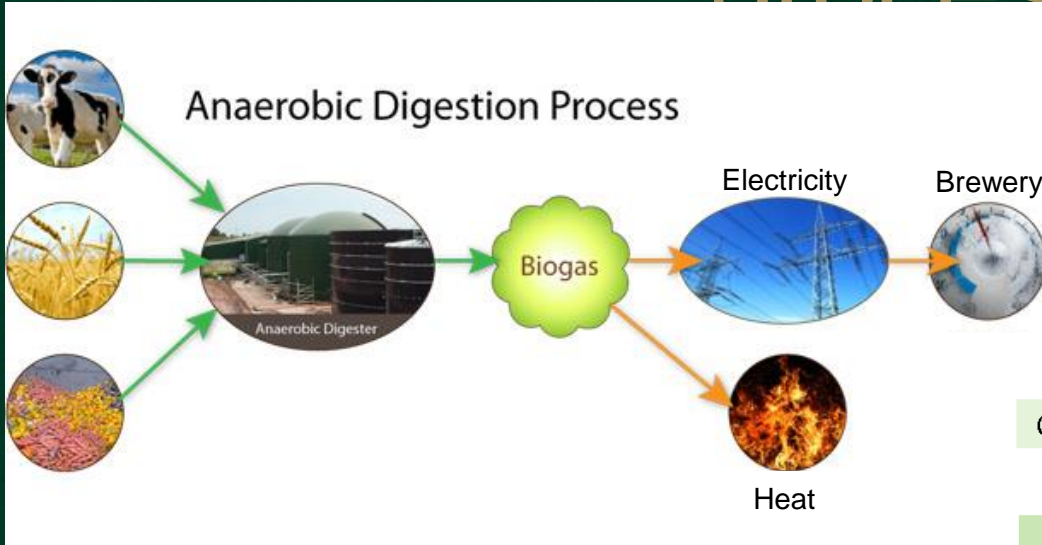

We are brewers!

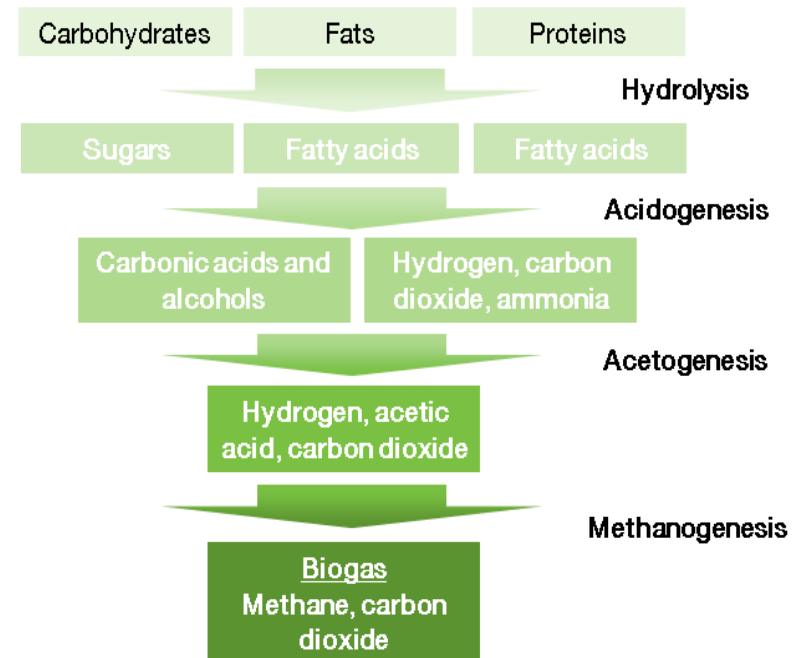

Since 1777

The Anaerobic digestion process

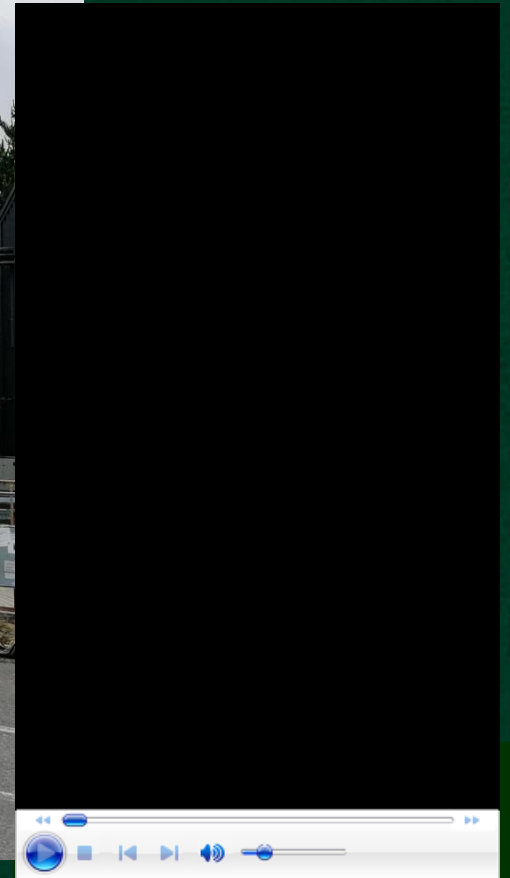

...in more detail

Hall & Woodhouse's Water Purification Plant

WPP

What does the WPP do ?

COD – Chemical Oxygen Demand (amount of oxygen required to decompose the organic matter, the energy potential).

The anaerobic bacteria reduce the water COD content by 95%

Produce Biogas @ 70% methane

Energy production

CHP = combined heat & power

8.2% of brewery
electricity

Sustainability at H&W brewery

- WPP is part of our goal to be carbon neutral by 2027 (250 yrs)
- Also, recycling cardboard, plastics, wood.....
- Solar PV
- New brewery initiatives
